

U. S. TRUCK BODY

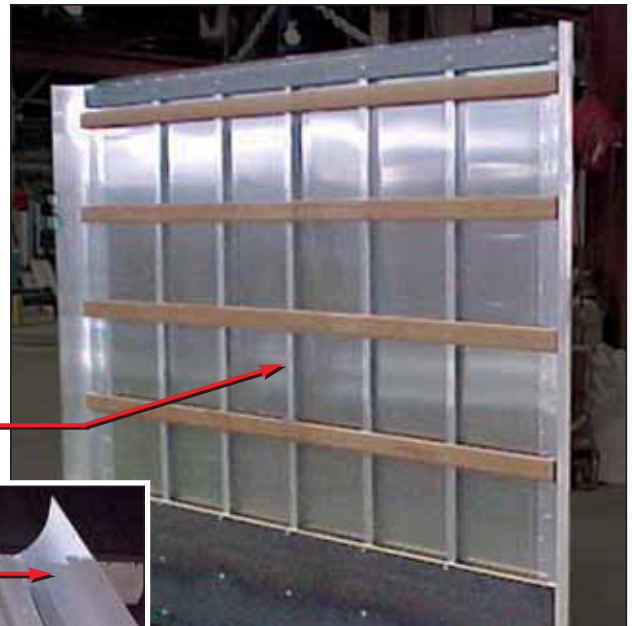

BODY LANGUAGE

Aluminum • FRP • Freight Plate • Moving • Service Trade Van Bodies

With Front Walls as tough as ours, we're ready for life's little bumps!

Take a look inside the front wall and under the floor of our aluminum truck body. You'll see why our bodies are built to outlast the competition.

First – We start with seven posts on the front wall, not five, to provide the extra support and strength.

Second – We use heavy-duty extruded aluminum radius corners, not roll form, to secure front posts and panels to the side walls.

Third – We designed our front scuff plate to extend below the hardwood floor so we can weld it along the bottom to the front cross member.

Fourth – Finally we use angled brackets to weld the front scuff plate to the side scuff plates.

The Result – Maximum impact resistance!

Chances are, next time you spot a truck body with the front wall pushed out, it will be our competition. And if you own a US Truck body, rest assured it's built US tough, to take life's little bumps.

For more information about our front walls or any other standard U.S. Truck Body quality feature, visit our web site at www.ustruckbody.com or contact us at 1-800-443-0843, by fax at 815-672-1490 or by e-mail at sales@ustruckbody.com.
